robbery reports

Why Site Crime Feels Worse Than Ever—And Why It Matters

Headlines, viral videos, and social media feeds make theft, vandalism, and break-ins feel constant. Even though FBI data shows certain violent crimes have declined, businesses and property owners say the opposite—crime feels like it's everywhere.

That perception has real costs. Construction firms, developers, and event operators can't afford delays, higher insurance premiums, or the reputational hit that comes when job sites and projects appear vulnerable.

When every incident makes the news, clients and communities lose confidence, even if the numbers don't tell the full story.

This growing gap between perception and reality means businesses need visible, proactive security. SiteStream exists to close that gap—delivering always-on surveillance that deters crime, protects assets, and restores peace of mind.

The Hidden Costs of Theft and Vandalism on Sites

The Real Impact: Lost Time, Higher Costs, Lower Trust

Theft and vandalism on job sites cost far more than just the value of what's stolen. Every incident causes ripple effects—delays in project schedules, higher insurance premiums, and reputational strain with clients who expect projects to stay secure and on track. Crews feel it too, as repeated incidents lower morale and create a sense of unease. While equipment can be replaced, the productivity, trust, and focus lost in the process often can't.

Businesses are now looking for smarter ways to safeguard remote, temporary, and high-value sites. Mobile surveillance solutions like SiteStream provide a visible deterrent, 24/7 monitoring, and real-time alerts that give managers oversight wherever they are. By combining rapid deployment with flexible coverage, SiteStream helps reduce losses, restore client confidence, and keep projects moving forward—without adding unnecessary overhead. It's a scalable layer of protection that strengthens the entire security strategy.

\$1 Billion

lost annually from construction site theft in the U.S.

**\$15 to
\$35 Billion**

in annual cargo theft damages nationwide.

\$500,000+

average loss when heavy equipment is stolen from a single job site.

\$10 Million

spent yearly by major cities cleaning up illegal dumping on commercial/industrial properties.

\$12 Billion

spent annually on graffiti cleanup across the U.S.

**1 in 5
businesses**

reports experiencing some form of theft, vandalism, or property damage at a temporary or remote location.

Hardware

SiteStream's units give you full command of any location you need to secure.

SPEAKER

Axis Network Loudspeaker

121 dB horn speaker with live talk-down, prerecorded audio, and two-way comms

MAST SYSTEM

20'6" Telescoping Mast

Manual crank + cable-guided mast for stability at full height

SOLAR PANELS

Dual 425W Bifacial Solar Panels

High-efficiency, front-and-back energy absorption for longer uptime

BATTERY BANK

460Ah Self-Heating Lithium Battery

3-4 days runtime without sunlight; designed for extreme cold

STABILIZING SYSTEM

4 Corner Stabilizing Jacks

High-efficiency, front-and-back energy absorption for longer uptime. Wind rate up to 90 mph

LIGHTS

Four Bright Lights

Blue LED Lights

CAMERAS

3 PTZ + 3 Fixed Cameras

360° coverage, 25x optical zoom, infrared night vision

ELECTRONICS BAY

Control & Power Distribution Box

Includes inverter, fuse block, charge controller, voltage booster, battery monitor

CONNECTIVITY HUB

LTE / 5G Router

Multi-carrier SIM + ready with 5-port switch & POE injector

GPS + ANTI-THEFT

GPS-Enabled with Lockable Enclosures

Secure steel housing with theft-resistant battery + remote tracking

GPS + ANTI-THEFT

GPS-Enabled with Lockable Enclosures

Secure steel housing with theft-resistant battery + remote tracking

Note: Additional features not shown include motion detection triggers, camera analytics with custom motion zones, system health monitoring via dashboard, and manual override capabilities for lights and speakers. The unit includes ruggedized wheels for easy towing, weatherproof cabling, tamper-resistant enclosures, and tool-free setup features designed for rapid deployment.

Software

SiteStream's software gives you full command of your fleet from any device. Whether managing 1 or 100 trailers, our cloud-based platform puts security control, diagnostics, and alerts at your fingertips — with no on-site presence required.

Core Features

VIEWING

Live Multi-Camera Viewing

Watch multiple PTZ and fixed cameras in real time from one dashboard.

CONTROLS

Remote PTZ Control

Pan, zoom, and control cameras remotely with low latency.

ZONES

Smart Motion Zones

Customize detection zones to reduce false alerts and increase accuracy.

ALERTS

Automated Alerts

Get instant email, text, or app notifications for motion or system events.

ACTIVATIONS

Speaker & Light Activation

Trigger lights or talk down through live or pre-recorded audio.

HEALTH

Fleet-Wide Health Monitoring

Check solar, battery, and connectivity status across all deployed units.

USERS

Multi-User Permissions

Easily manage access for teams and clients with full audit logging.

STORAGE

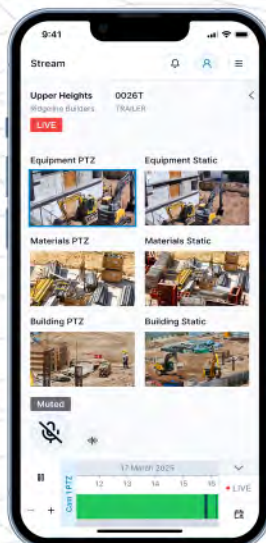

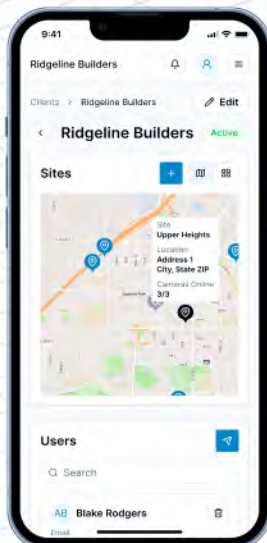

Cloud Video Storage

Securely store and review clips from anywhere with unlimited history options.

FILTERING

Streamlined Event Filtering

Identify people, vehicles, or equipment quickly to speed up investigations.
